

## What happens if a user is directed to Papaki through my Affiliate Banner / URL, but does not make a purchase right away?

- 2022-12-17 - Affiliates

Once the customer visits our website through your affiliate banners or your affiliate URL, a cookie will be stored on his browser for 30 days. This means that if the customer purchases a hosting plan from Papaki even 30 days after visiting our website, the purchase will be considered to have been made by the affiliate.

The purchase can be recorded only as long as the user has not deleted the cookie. Furthermore, if the user should use the same affiliate tools once again to visit Papaki, the expiration date of the cookie will be extended by 30 days.
