

How can I set the price of a product on my eShop?

- 2021-08-18 - WooCommerce eShop

You set the price of a product when you add the product to your eShop, following the instructions described below.

1. Log in to your WooCommerce admin panel (wp-admin), and go to Product > Add product.
2. In Product Data > General fill in the regular price (€) and after you fill in all the necessary fields with the information about your product click General, click Publish.
