

If I use my own domain, will you provide me with email accounts?

- 2021-07-07 - WooCommerce eShop

PapakiShop.gr offers you only the hosting of the pages you create through its platform.

To have your own email accounts you need to register a domain, purchase a hosting plan and then use the email services for this domain (you will be able to own an email account under your domain eg. email@myshop.gr).

Papaki offers a complete range of [domain registration](#) and [web hosting services](#).
