

What is automatic billing at Papaki?

- 2023-01-04 - Πληρωμές

After you have completed your order at Papaki, the invoice/receipt of your order will be automatically sent to you by email (.pdf file) and within 24 hours, it will be displayed [inside your Control Panel account](#).

In case you find out that you have made a mistake in your billing information details, [you can fix that](#) within 5 minutes after you submit your order.

You can edit your billing information details from your Control Panel, any time you wish. If you wish, you can also receive invoices or receipts with different billing details for any future order.

Note: You can change your billing information details only if they follow the same tax scheme (eg. If you have entered tax information from Greece (V.A.T. [papaki3_token_vat]%) you cannot enter other country's tax details. In that case, you need to create a new Papaki account and enter the other country's tax details).
