

What is the SSL money warranty?

- 2022-11-17 - SSL Πιστοποιητικά

The warranty represents the biggest amount of money that the Certificate Authority (e.g. Comodo) can give to the user as compensation in case that the encrypted data are deciphered.

In this way, with the SSL you offer one more security level to your customers so that they keep buying from your website.

The term and conditions of the respective Certificate Authority apply to all money warranties.
