The services you buy at Papaki are automatically activated, with the confirmation of your payment, by our accounting department.

In addition, the moment your services will be active, you will receive an email with subject, eg. for a hosting purchase "Web Hosting Activation - Account Login Information". Inside this email you will also find all important information and passwords, to manage your new services.

.GR domains are automatically activated, right after your order. This means, you do not need to wait for our accounting department to confirm you payment, in order to use your new .GR domains.
